EXCEL INTRODUCTION

- **MS Excel** :- Microsoft Office ka ek powerful spreadsheet software hai jo data enter, calculate, organize aur analyze karne ke liye use hota hai.
- Excel me hum **rows aur columns** ke form me kaam karte hain.
- Row aur Column ke milne se jo box banta hai use **Cell** kehte hain.
- Har cell ka apna ek address hota hai jaise **A1, B2, C5** etc.

Excel ka Use Kahan Hota Hai?

- Salary sheet banane ke liye.
- Student result banane ke liye.
- Bill banane ke liye.
- Stock maintain karne ke liye.
- Data calculation karne ke liye.
- Graph / Chart banane ke liye.
- Attendance sheet banane ke liye.

Excel File Terms

- **Workbook** :- Excel ki file ko workbook kehte hain.
- **Worksheet / Sheet** :- Workbook ke andar pages ko worksheet kehte hain.
- **Rows** :- Horizontal lines hoti hain (1,2,3...).
- **Columns** :- Vertical lines hoti hain (A,B,C...).
- **Cell** :- Row aur column ka milne wala box.
- **Range** :- Multiple cells ka group. Jaise A1:A10

Excel Features

- Fast calculation formulas ke through.
- Auto Sum ka option.
- Sorting aur Filtering.
- Charts aur Graphs.
- Conditional Formatting.
- Data Analysis.
- Tables banana.

=SUM(A1:A10)

=AVERAGE(B2:B10)

=IF(C2>100,
"High","Low")

=VLOOKUP(E2,
A2:D10,4,FALSE)

COLUMN

CELLS

SELECTION METHODS

Mouse Selection

- **Cursor cells ke bich me rakhkar drag karne se :-** Multiple cells select hoti hain.
- **Cursor cell ki boundary par rakhkar drag karne se :-** Selected cells move hoti hain.
- **Cursor cell ke corner (Fill Handle) par rakhkar drag karne se :-** Data / series / formula auto fill hota hai.
- **Single Click :-** Ek cell select karne ke liye.

Keyboard Selection

- **Shift + Arrow Keys :-** Ek-ek cell select badhane ke liye.
- **Ctrl + Shift + Arrow Keys :-** Data ke last filled cell tak select karne ke liye.
- **Shift + Spacebar :-** Puri row select karne ke liye.
- **Ctrl + Spacebar :-** Pura column select karne ke liye.
- **Ctrl + A :-** Current data range / pura sheet select karne ke liye.
- **Ctrl + Shift + Spacebar :-** Puri worksheet select karne ke liye.

Advanced Selection

- **Name Box me range likhkar (jaise A1:D10) :-** Direct range select karne ke liye.
- **Ctrl daba kar cells click :-** Alag-alag multiple cells select karne ke liye.
- **Shift daba kar first aur last cell click :-** Beech ka pura range select karne ke liye.
- **F8 :-** Extend Selection mode on karne ke liye.
- **Esc :-** Extend Selection mode off karne ke liye.

Useful Note

- **Row number par click :-** Puri row select hoti hai.
- **Column letter par click :-** Pura column select hota hai.

- **Top-left triangle button click** :- Puri worksheet select hoti hai.

NAVIGATION & WORKSHEET LIMITS

- **Go to Last Row** :- **Ctrl + Down Arrow** se data ke last filled row tak ja sakte hain.
- **Go to Last Column** :- **Ctrl + Right Arrow** se data ke last filled column tak ja sakte hain.
- **Go to First Row** :- **Ctrl + Up Arrow** se upar ke last filled cell tak ja sakte hain.
- **Go to First Column** :- **Ctrl + Left Arrow** se left side ke last filled cell tak ja sakte hain.

Excel Worksheet Limits

- **Last Column Name** :- XFD
- **Total Rows** :- 10,48,576
- **Total Columns** :- 16,384
- **Last Cell Address** :- XFD1048576

=randbetween(23,90) :- 2 numbers ke bich ke numbers lane ke liyye

Formulas ko values me convert karne ke liye:- select formulas → ctrl + c → ctrl + alt + v → value → ok
→ Esc

FILE OPTIONS

- **Home** :- Main working screen par wapas jane ke liye.
- **New** :- Nayi blank workbook ya template kholne ke liye. (**Ctrl + N**)
- **Open** :- Pehle se saved workbook kholne ke liye. (**Ctrl + O**)
- **Share** :- Workbook ko dusron ke saath share karne ke liye.
- **Info** :- Workbook ki properties, size, author aur protection details dekhne ke liye.
- **Save** :- Current workbook save karne ke liye. (**Ctrl + S**)
- **Save As** :- Saved Workbook ko naye naam, naye format ya nayi location me save karne ke liye. (**F12**)
- **Print** :- Worksheet ya workbook print karne ke liye. (**Ctrl + P**)
- **Export** :- Workbook ko PDF ya dusre format me convert/save karne ke liye.
- **Close** :- Current workbook band karne ke liye. (**Ctrl + W**)

The Artificial Education

HOME TAB

CLIPBOARD GROUP

- **Paste** :- Copy ya Cut kiya hua data cells me chipkane ke liye.
- **Cut** :- Selected cell data ko hata kar clipboard me bhejne ke liye. (**Ctrl + X**)
- **Copy** :- Selected cell data ki copy karne ke liye. (**Ctrl + C**)
- **Format Painter** :- Ek cell ki formatting dusri cells par apply karne ke liye.

FONT GROUP

- **Font Name** :- Text ka font style change karne ke liye.
- **Font Size** :- Text size chhota ya bada karne ke liye.
- **Increase Font Size** :- Font size badhane ke liye.
- **Decrease Font Size** :- Font size kam karne ke liye.
- **Bold** :- Text ko mota/dark karne ke liye. (**Ctrl + B**)
- **Italic** :- Text ko tircha karne ke liye. (**Ctrl + I**)
- **Underline** :- Text ke niche line lane ke liye. (**Ctrl + U**)
- **Borders** :- Cell ke around border lagane ke liye.
- **Fill Color** :- Cell ke background me color bharne ke liye.
- **Font Color** :- Text ka color change karne ke liye.

Created by

The Artificial Education

ALIGNMENT GROUP

- **Top Align** :- Text ko cell ke upar lane ke liye.
- **Middle Align** :- Text ko beech me lane ke liye.
- **Bottom Align** :- Text ko niche lane ke liye.
- **Orientation** :- Text ko ghumane / rotate karne ke liye.
- **Align Left** :- Text ko left side lane ke liye.
- **Center** :- Text ko beech me lane ke liye.
- **Align Right** :- Text ko right side lane ke liye.
- **Decrease Indent** :- Text ko left shift karne ke liye.
- **Increase Indent** :- Text ko right shift karne ke liye.
- **Wrap Text** :- Long text ko same cell me next line me dikhane ke liye. (alt+enter)
- **Merge & Center** :-
 - **Merge & Center** :- Selected cells ko jodkar text ko beech me lane ke liye.
 - **Merge Across** :- selected cells ka only columns merge karne ke liye.
 - **Merge Cells** :- Selected cells ko sirf merge karne ke liye, center nahi karta.
 - **Unmerge Cells** :- Merged cells ko alag-alag normal cells me todne ke liye.

NUMBER GROUP

- **General** :- Normal default format hota hai. Koi specific format nahi lagta.
- **Number** :- Numbers ko decimal places ke saath dikhane ke liye.
- **Currency** :- Number ke saath currency symbol lagane ke liye. (₹, \$, €)
- **Accounting** :- Currency ko proper aligned style me dikhane ke liye.
- **Short Date** :- Chhoti date format me dikhane ke liye.

Example: 27-04-2026

- **Long Date** :- Full date format me dikhane ke liye.

Example: Monday, 27 April 2026

- **Time** :- Time format me dikhane ke liye.

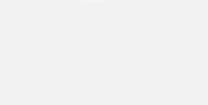

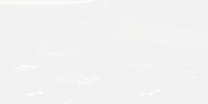

Example: 10:30 AM

=SUM(A1:A10)

=AVERAGE(B2:B10)

=IF(C2>100,
"High","Low")

=VLOOKUP(E2,
A2:D10,4,FALSE)

- **Percentage** :- Number ko percent format me dikhane ke liye.

Example: 0.50 = 50%

- **Fraction** :- Decimal number ko fraction me dikhane ke liye.

Example: 0.5 = 1/2

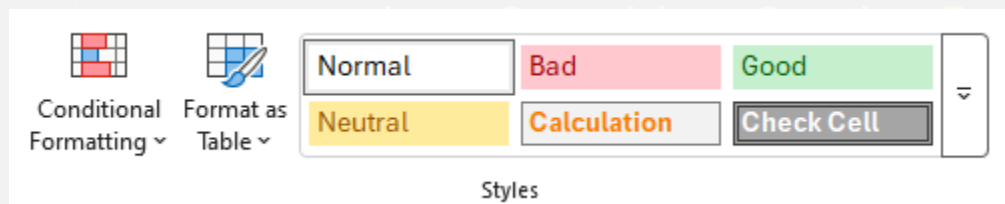

- **Scientific** :- Badi value ko power format me dikhane ke liye.

Example: 1000 = 1.00E+03

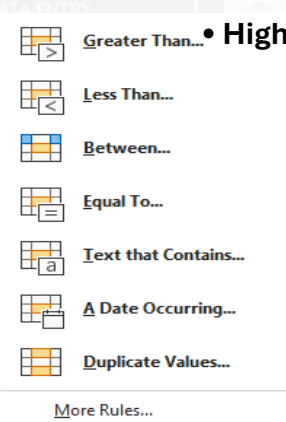

- **Text** :- Number ya data ko text ki tarah treat karne ke liye.

- **More Number Formats** :- Extra custom formatting options kholne ke liye.

STYLES GROUP

- **Conditional Formatting** :- selected cells ko condition laga kar highlight karne ke liye.

- **Highlight Cells Rules** :- Condition ke hisaab se selected cells highlight karne ke liye.

- **Greater Than** :- Jo number dalege usse bada number highlight karne ke liye

- **Less Than** :- Jo number dalege usse chhota number highlight karne ke liye

- **Between** :- Do numbers ke beech ke number highlight karne ke liye.

- **Equal To** :- Jo dala hai usi ko highlight karne ke liye

- **Text that Contains** :- jo digit dalege vo jis number me hoga vo highlight hoga.

- **A Date Occurring** :- select ki gai dates me se Yesterday, Today, Tomorrow, Last Week etc. highlight karne ke liye

- **Duplicate Values** :- Same repeated values highlight karne ke liye.

- **Top/Bottom Rules** :- Highest ya lowest values highlight karne ke liye.

Top 10 Items...

- **Top 10 Items...** :- Selected numbers me se 10 sabse bade numbers highlight karne ke liye.

Top 10 %...

- **Top 10 %...** :- Selected numbers ka 10% number highlight karne ke liye, jo sabse bade hai.

Bottom 10 Items...

- **Bottom 10 Items...** :- Selected numbers me se 10 sabse chhote numbers highlight karne ke liye.

Bottom 10 %...

- **Bottom 10 %...** :- Selected numbers ka 10% number highlight karne ke liye, jo sabse chhote hai.

Above Average...

- **Above Average...** :- Average se badi values highlight karne ke liye.

Below Average...

- **Below Average...** :- Average se chhoti values highlight karne ke liye.

- **Data Bars** :- Cells ke andar bar graph dikhane ke liye value ke hisaab se.

- **Color Scales** :- Values ke according alag-alag colors show karne ke liye.

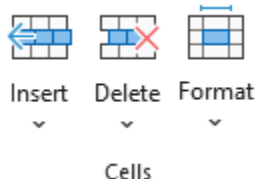

- **Icon Sets** :- Values ke hisaab se arrows, stars, traffic lights jaise icons lagane ke liye.

- **Format as Table** :- Selected data ko table style me convert karne ke liye.

Number Filters

- **Equals...** :- Sirf wahi values dikhane ke liye jo diye gaye number ke equal ho.
- **Does Not Equal...** :- Diye gaye number ke alawa sab values dikhane ke liye.
- **Greater Than...** :- Diye gaye number se badi values dikhane ke liye.
- **Greater Than Or Equal To...** :- Diye gaye number ke barabar ya badi values dikhane ke liye.
- **Less Than...** :- Diye gaye number se chhoti values dikhane ke liye.
- **Less Than Or Equal To...** :- Diye gaye number ke barabar ya chhoti values dikhane ke liye.
- **Between...** :- Do numbers ke beech wali values dikhane ke liye.
- **Top 10...** :- Sabse badi top values dikhane ke liye.
- **Above Average** :- Average se badi values dikhane ke liye.
- **Below Average** :- Average se chhoti values dikhane ke liye.
- **Custom Filter...** :- Apni condition laga kar filter karne ke liye.
- **Cell Styles** :- Ready-made cell styles apply karne ke liye.
Jaise: Normal, Bad, Good, Neutral, Calculation, Check Cell etc.

CELLS GROUP

- **Insert** :- Naye cells, rows, columns ya worksheet insert karne ke liye.
 - **Insert Cells...** :- Selected area me naye cells insert karne ke liye aur existing cells ko shift karne ke liye. **(ctrl++)**
 - **Insert Sheet Rows** :- Selected row ke upar nayi row insert karne ke liye. **(ctrl++)**
 - **Insert Sheet Columns** :- Selected column ke left side naya column insert karne ke liye. **(ctrl++)**
 - **Insert Sheet** :- Nayi worksheet / sheet insert karne ke liye. **(shift + f11)**
- Note** :- cells, row, column jisko select karke short cut key ka use karege vahi insert hoga
- **Delete** :- Cells, rows, columns ya worksheet delete karne ke liye.
 - **Delete Cells...** :- Selected cells delete karne ke liye aur baaki cells ko shift karne ke liye. **(ctrl + -)**
 - **Delete Sheet Rows** :- Selected puri row delete karne ke liye. **(ctrl + -)**
 - **Delete Sheet Columns** :- Selected pura column delete karne ke liye. **(ctrl+-)**
 - **Delete Sheet** :- Current worksheet / sheet delete karne ke liye.

- **Format** :- Row height, column width, hide/unhide, sheet rename, protect etc. settings ke liye.

Cell Size

- **Row Height...** :- Selected row ki height set karne ke liye.
- **AutoFit Row Height** :- Content ke hisaab se row height automatic adjust karne ke liye.
- **Column Width...** :- Selected column ki width set karne ke liye.
- **AutoFit Column Width** :- Content ke hisaab se column width automatic adjust karne ke liye.
- **Default Width...** :- Sab columns ki default width set karne ke liye.

Visibility

- **Hide & Unhide** :- Rows, columns ya sheets hide/unhide karne ke liye.

Hide column :- ctrl+0

Hide row :- ctrl + 9

Unhide column :- alt + h + o + u + l

unhide row :- ctrl + shift + 9

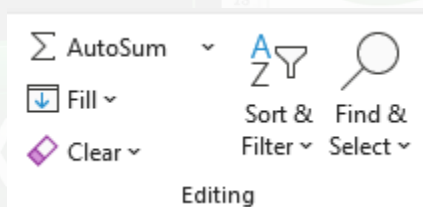

Organize Sheets

- **Rename Sheet** :- Sheet ka naam badalne ke liye.
- **Move or Copy Sheet...** :- Sheet ko move ya duplicate copy karne ke liye.
- **Tab Color** :- Sheet tab ka color change karne ke liye.

Protection

- **Protect Sheet...** :- Sheet ko password ya restrictions se protect karne ke liye.
- **Lock Cell** :- Selected cells ko locked status dene ke liye (Protect Sheet ke saath kaam karta hai).jo cells locked hoti hai vahi protect hoti hai.

EDITING GROUP

- **AutoSum (Σ)** :- Jaldi se Sum, Average, Count, Max, Min lagane ke liye. **(Alt+=)**
- **Fill** :- Series, copy ya direction me data fill karne ke liye.
 - **Down** :- Upar wale cell ka data niche selected cells me fill karne ke liye. **(ctrl + d)**
 - **Right** :- Left wale cell ka data right side selected cells me fill karne ke liye. **(ctrl + r)**
 - **Up** :- Niche wale cell ka data upar selected cells me fill karne ke liye.
 - **Left** :- Right wale cell ka data left side selected cells me fill karne ke liye.

• **Across Worksheets...** :- ye option multiple sheets select karne ke baad highlight hota hai
iska use:- selected data ko selected sheets me le jane ke liye karte hai.

• **Series...** :- Number, date ya pattern ko series me fill karne ke liye.

Jaise: 1,2,3... ya Jan, Feb, Mar...

• **Justify** :- agar koi text cells se bahar jata hai to usko next row me karne ke liye.

• **Flash Fill** :- Pattern samajhkar automatic data fill karne ke liye. **(Ctrl + e)**

Jaise Full Name se First Name alag karna.

• **Clear** :- Cell ka content, format ya comments hataane ke liye.

• **Sort & Filter** :- Data ko A to Z, Z to A ya filter karne ke liye.

• **Find & Select** :- Data search, replace, Go To, formulas ya blanks select karne ke liye.

• **Find...** :- Kisi word, number ya data ko worksheet me dhoondhne ke liye. **(Ctrl + F)**

• **Replace...** :- Ek data ko dusre data se badalne ke liye. **(Ctrl + H)**

• **Go To...** :- Kisi specific cell address ya range par jane ke liye. **(Ctrl + G)**

• **Go To Special...** :- Formulas, blanks, comments, constants jaise special cells select karne ke liye. . **(Ctrl + G)+ (Alt+S)**

• **Notes** :- Notes / comments wale cells select karne ke liye.

• **Constants** :- Typed fixed data wale cells select karne ke liye.

Jaise text, number etc.

• **Formulas** :- Formula lage hue cells select karne ke liye.

• **Numbers** :- Numeric values wale cells select karne ke liye.

• **Text** :- Text data wale cells select karne ke liye.

• **Logicals** :- TRUE / FALSE values wale cells select karne ke liye.

• **Errors** :- Error values wale cells select karne ke liye.

Jaise #DIV/0!, #VALUE!, #NAME? etc.

• **Blanks** :- Khali (empty) cells select karne ke liye.

• **Current Region** :- Connected data range select karne ke liye.

• **Current Array** :- Current array formula ka pura range select karne ke liye.

• **Objects** :- Shapes, charts, pictures jaise objects select karne ke liye.

Formula Auditing Options

• **Row Differences** :- Har row me different values wale cells select karne ke liye.

• **Column Differences** :- Har column me different values wale cells select karne ke liye.

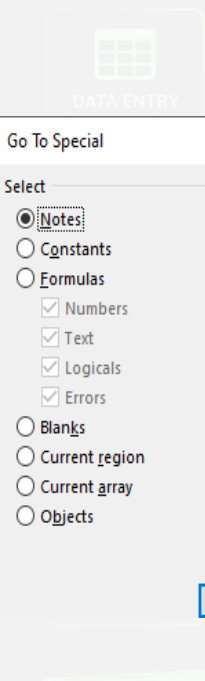

• **Precedents** :- Current formula me use hue referenced cells select karne ke liye.

• **Dependents** :- Current selected cell par dependent formulas select karne ke liye.

• **Last Cell** :- Worksheet ka last used cell select karne ke liye.

Visibility / Format Options

• **Visible Cells Only** :- Sirf visible cells select karne ke liye (hidden ko chhodkar).

=SUM(A1:A10)

=AVERAGE(B2:B10)

=IF(C2>100,
"High","Low")

=VLOOKUP(E2,
A2:D10,4,FALSE)

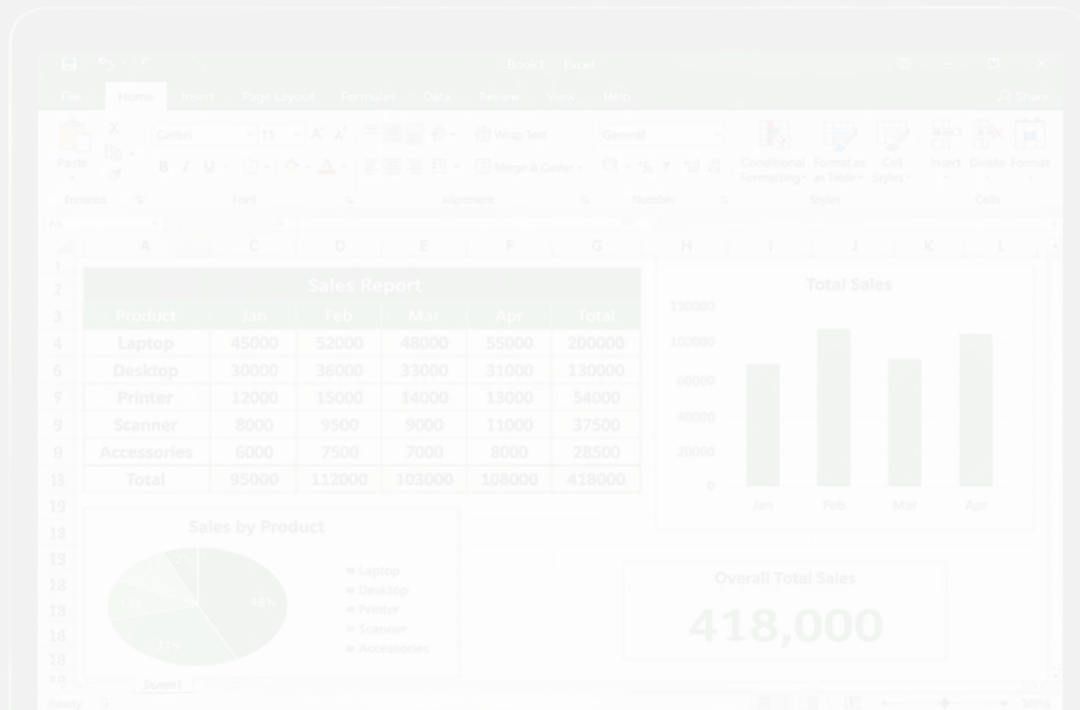

- **Conditional Formats** :- Conditional formatting wale cells select karne ke liye.
- **Data Validation** :- Data validation rules wale cells select karne ke liye.
- **All** :- Sab validation wale cells select karne ke liye.
- **Same** :- Same validation rule wale cells select karne ke liye.

Object Selection

- **Select Objects** :- Shapes, charts, pictures jaise objects select karne ke liye.
- **Selection Pane...** :- Sabhi objects ki list dekhne, hide/show aur select karne ke liye.

INSERT TAB

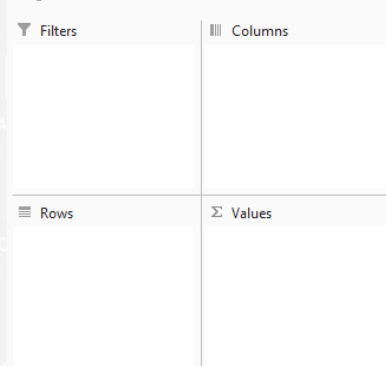

TABLES GROUP

- **PivotTable** :- Large data ka summary report banane ke liye.

PivotTable Fields (Kaunsa Field Kahan Jaata Hai)

Drag fields between areas below:

◆ Filters

- Yahan wo field aati hai jisse tum **poori report ko filter** karna chahte ho

👉 Example:

- Month
- Year
- Region

📌 Use: Top me dropdown aata hai → ek value select karo → poora data change

◆ Columns

- Yahan wo field aati hai jis field me values kam hoti hai. Text bhi ho sakti hai numer bhi.

👉 Example:

- Month
- Category

📌 Output: Columns me headings ban jaati hain

◆ Rows

- Yahan wo field aati hai jisme text hota hai

👉 Example:

- Name
- Product
- City

📌 Output: Left side list ban jaati hai

◆ Values

- Yahan wo field aati hai jisme **calculation hoti hai**

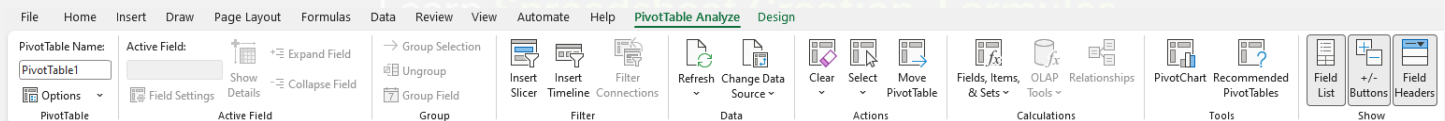

👉 Example:

- Sales
- Marks
- Quantity

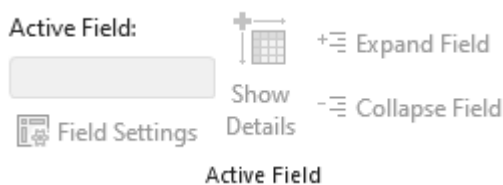

👉 Output:

Sum, Count, Average automatically lagta hai

PIVOTTABLE ANALYZE TAB

Active Field Group

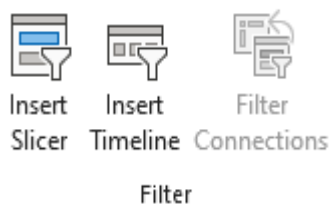

- **Active Field** :- Currently selected field ki details dekhne ke liye.
- **Field Settings** :- Field ke formulas change karne ke liye.

Group

- **Group Selection** :- Selected data ko group karne ke liye.
- **Ungroup** :- Group ko todne ke liye.
- **Group Field** :- Date/number ko months, quarters, years me group karne ke liye.
- **Expand Field** :- Group ke andar ka data expand (show) karne ke liye.
- **Collapse Field** :- Group ko collapse (hide) karne ke liye.

Filter Group

- **Insert Slicer** :- Buttons ke through PivotTable filter karne ke liye.
- **Insert Timeline** :- Date-wise filter lagane ke liye.
- **Filter Connections** :- Ek slicer ko multiple PivotTables se connect karne ke liye.

Data Group

- **Refresh** :- PivotTable ko latest data ke saath update karne ke liye.
- **Change Data Source** :- PivotTable ka data source change karne ke liye.

Actions Group

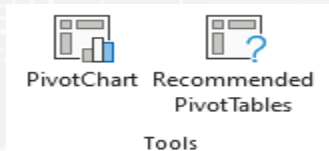

- **Clear** :- PivotTable formatting ya filters remove karne ke liye.
- **Select** :- PivotTable ke parts (table, values, labels) select karne ke liye.
- **Move PivotTable** :- PivotTable ko dusri sheet ya location par shift karne ke liye.

Calculations Group

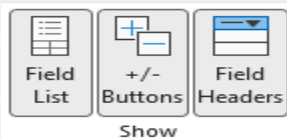

- **Fields, Items & Sets** :- Calculated field ya item banane ke liye.
- **OLAP Tools** :- Advanced data analysis tools ke liye.
- **Relationships** :- Tables ke beech relation create karne ke liye.
Jab data server se aata hai to iska use hota hai.

Tools Group

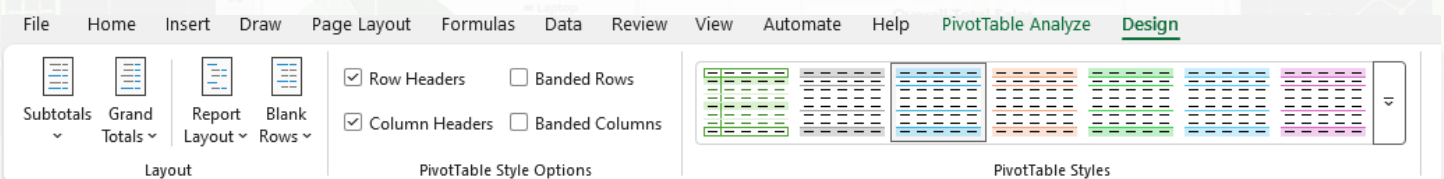

- **PivotChart** :- PivotTable ka chart banane ke liye.
- **Recommended PivotTables** :- Suggested PivotTable layouts dekhne ke liye.

Show Group

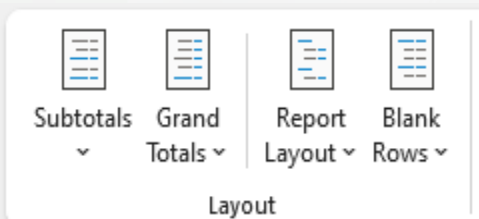

- **Field List** :- PivotTable ke fields panel show/hide karne ke liye.
- **+/- Buttons** :- Expand/Collapse buttons show/hide karne ke liye.
- **Field Headers** :- Field headings show/hide karne ke liye.

PIVOTTABLE DESIGN TAB

Layout Group

- **Subtotals** :- PivotTable me subtotals show/hide karne ke liye aur unki position set karne ke liye.
- **Grand Totals** :- Rows aur columns ke total show/hide karne ke liye.
- **Report Layout** :- PivotTable ka layout change karne ke liye.
(Jaise: Compact, Outline, Tabular form)
- **Blank Rows** :- Data ke beech blank row insert/remove karne ke liye.

CONTROLS GROUP

- **Checkbox** :- Tick mark option insert karne ke liye.

CHARTS GROUP

- **Recommended Charts** :- Data ke hisaab se suitable charts suggest karne ke liye.
- **Column Chart** :- Vertical bars chart banane ke liye.
- **Line Chart** :- Trend line chart banane ke liye.
- **Pie Chart** :- Percentage share dikhane ke liye.
- **Bar Chart** :- Horizontal bars chart banane ke liye.
- **Area Chart** :- Filled area trend chart banane ke liye.
- **Scatter Chart** :- X-Y comparison chart banane ke liye.
- **Combo Chart** :- Do alag chart types combine karne ke liye.
- **PivotChart** :- PivotTable ka chart banane ke liye.

CHART DESIGN TAB

Chart Layouts Group

- **Add Chart Element** :- Chart me title, axis, legend, data labels jaise elements add karne ke liye.
- **Quick Layout** :- Ready-made chart layouts apply karne ke liye.

Chart Styles Group

- **Change Colors** :- Chart ke colors change karne ke liye.
- **Chart Styles Gallery** :- Ready-made chart styles apply karne ke liye.
- **More Styles (▼)** :- Aur styles dekhne ke liye.

Data Group

- **Switch Row/Column** :- Data ko row se column ya column se row me switch karne ke liye.
- **Select Data** :- Chart ke data range ko change karne ke liye.

Type Group

- **Change Chart Type** :- Chart ka type change karne ke liye.
(Jaise Column, Line, Pie etc.)

Location Group

- **Move Chart** :- Chart ko dusri sheet ya location par shift karne ke liye.

MAPS GROUP

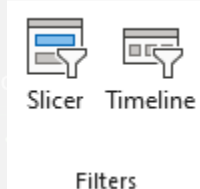

- **Maps** :- Geographic data ka map chart banane ke liye.

SPARKLINES GROUP

- **Line** :- Cell ke andar mini line chart banane ke liye.
- **Column** :- Cell ke andar mini column chart banane ke liye.
- **Win/Loss** :- Positive negative comparison mini chart ke liye.

Spart line ya to ek column ki banti hai ya ek hi row ka

FILTERS GROUP

- **Slicer** :- Tables/PivotTable ko buttons se filter karne ke liye.
- **Timeline** :- Date wise filter karne ke liye.

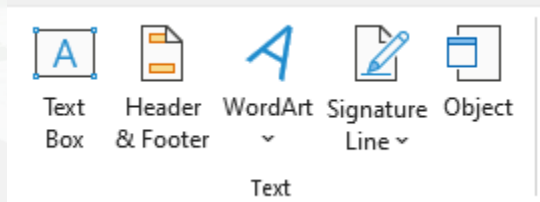

LINKS GROUP

- **Link** :- Hyperlink insert karne ke liye.

COMMENTS GROUP

- **Comment** :- Cell me comment add karne ke liye.

TEXT GROUP

- **Text Box** :- Custom text box insert karne ke liye.
- **Header & Footer** :- Page ke top/bottom text add karne ke liye.
- **WordArt** :- Stylish text insert karne ke liye.
- **Signature Line** :- Digital signature line insert karne ke liye.
- **Object** :- Dusri file/object embed karne ke liye.

PAGE LAYOUT TAB

THEMES GROUP

- **Themes** :- Puri workbook ka design/theme apply karne ke liye.
- **Colors** :- Workbook ke Theme ke colors change karne ke liye.
- **Fonts** :- Workbook ke fonts change karne ke liye.
- **Effects** :- Shapes aur graphics ke effects change karne ke liye.

PAGE SETUP GROUP

- **Margins** :- Page ke charo taraf space set karne ke liye.
- **Orientation** :- Page ko Portrait ya Landscape me set karne ke liye.
- **Size** :- Paper size set karne ke liye (A4, Letter etc.)
- **Print Area** :- Select kiye gay data ko print ke liye set karne ke liye.
- **Breaks** :- Page breaks lagane ke liye.
- **Background** :- Sheet ka background image set karne ke liye.
- **Print Titles** :- Har page par table heading /first column repeat karne ke liye.

SCALE TO FIT GROUP

- **Width** :- Print me kitne pages me width fit hogi set karne ke liye.
- **Height** :- Print me kitne pages me height fit hogi set karne ke liye.
- **Scale** :- page se bahar nikla hua data adjust karne ke liye.

SHEET OPTIONS GROUP

- **Gridlines View** :- Screen par gridlines show/hide karne ke liye.
- **Gridlines Print** :- Print me gridlines show karne ke liye.
- **Headings View** :- Row/column headings (A,B,C / 1,2,3) show karne ke liye.
- **Headings Print** :- Print me headings show karne ke liye.

FORMULAS TAB

DEFINED NAMES GROUP

- **Name Manager** :- Workbook me defined names (ranges/formulas) Edit karne ke liye.
- **Define Name** :- selected cells ka koi ek name set karne ke liye.
- **Use in Formula** :- Defined names ko formula me use karne ke liye.
- **Create from Selection** :- Selected cells ka row wise ya column wise name define karne ke liye.

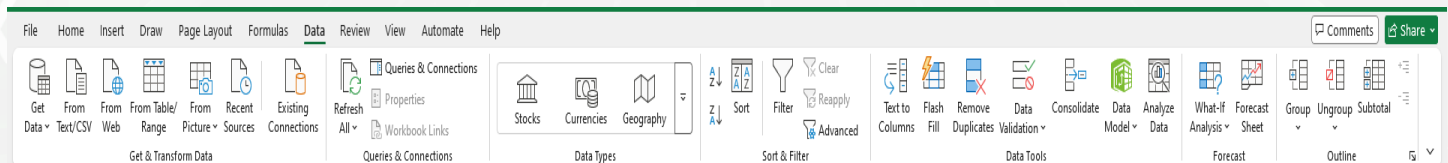

FORMULA AUDITING GROUP

- **Trace Precedents** :- Selected formula me include cells (jahan se data aa raha hai) dekhane ke liye.
- **Trace Dependents** :- Selected cell par dependent formulas dekhane ke liye.
- **Remove Arrows** :- Trace arrows hataane ke liye.
- **Show Formulas** :- Cells me formulas show karne ke liye (result ki jagah).
- **Error Checking** :- Formula errors check karne ke liye.
- **Evaluate Formula** :- Formula ko step-by-step check karne ke liye.
- **Watch Window** :- Important cells ko monitor karne ke liye.

CALCULATION GROUP

- **Calculation Options** :- Calculation mode set karne ke liye (Automatic / Manual).
- **Calculate Now** :- Puri workbook ko calculate/refresh karne ke liye.
- **Calculate Sheet** :- Current sheet ko calculate karne ke liye.

DATA TAB

GET & TRANSFORM DATA GROUP

- **Get Data** :- Different sources (file, database, web) se data import karne ke liye.
- **From Text/CSV** :- Text ya CSV file se data import karne ke liye.(notepad)
- **From Web** :- Website se data import karne ke liye.

- **From Table/Range** :- Selected table/range ko Power Query me load karne ke liye.
- **From Picture** :- Image se data extract karke Excel me lane ke liye.
- **Recent Sources** :- Recently use kiye gaye data sources open karne ke liye.
- **Existing Connections** :- Pehle se saved connections use karne ke liye.

Notepad se koi data lane ke liye :- **data → from text → select folder → select file → import → load**

Pdf se koi data lane ke liye :- **data → get data → from file → select folder → select pdf → import → select table → load**

Agar pdf file ya note pad file nahi hai to banani padegi

Excel data ko pdf me convert karne ke liye :- **f12 → enter file name → save as type → pdf → save**

QUERIES & CONNECTIONS GROUP

- **Refresh All** :- Sabhi queries aur connections ko update karne ke liye.
- **Queries & Connections** :- Queries aur connections list dekhne ke liye.
- **Properties** :- Connection ki properties change karne ke liye.
- **Workbook Links** :- Linked files ki details dekhne ke liye.

DATA TYPES GROUP

- **Stocks** :- Stock market related data convert karne ke liye.
- **Currencies** :- Currency data convert karne ke liye.
- **Geography** :- Location based data convert karne ke liye.

SORT & FILTER GROUP

- **Sort A to Z** :- Data ascending order me sort karne ke liye.
- **Sort Z to A** :- Data descending order me sort karne ke liye.
- **Sort** :- Custom sorting apply karne ke liye.
- **Filter** :- Data filter lagane ke liye.
- **Clear** :- Applied filter/sort remove karne ke liye.
- **Reapply** :- Resent Filter dobara apply karne ke liye.
- **Advanced** :- Advanced filter lagane ke liye.

Action

- **Filter the list, in-place** :- Same data range me filter apply karne ke liye (original jagah par hi filtered data dikhata hai).
- **Copy to another location** :- Filtered data ko kisi dusri jagah (new range) me copy karne ke liye.

Range Options

- **List range** :- Jis data range par filter lagana hai usko select karne ke liye.

- **Criteria range** :- Condition (criteria) wale cells select karne ke liye.
- **Copy to** :- Filtered data ko jahan paste karna hai us range ko select karne ke liye.

Special Option

- **Unique records only** :- Sirf unique (duplicate hata kar) records dikhane ke liye.

Important Note

- Advanced Filter me pehle criteria likhna padta hai (jaise marks > 50).
- Simple filter se powerful hota hai kyunki multiple conditions ek saath laga sakte ho. 🧠

Learn Spreadsheet Creation, Formulas, Data Analysis and Professional Reporting using MS Excel

DATA TOOLS GROUP

- **Text to Columns** :- Ek column ke data ko multiple columns me split karne ke liye.
 - **Delimited** :- Text ko special characters ke base par split karne ke liye. Jaise: comma (,), tab, space etc.
 - 👉 Example: Ram,85,Pass → alag-alag columns me divide ho jayega
 - **Fixed Width** :- agar text me koi delimiter nahi hai to
 - 👉 Example: Ram85Pass → ram 85 Pass
- **Flash Fill** :- Pattern ke according data auto fill karne ke liye.
- **Remove Duplicates** :- Table me se columns me se Duplicate entries hataane ke liye.
- **Data Validation** :- selected Cells me condition lagane ke liye

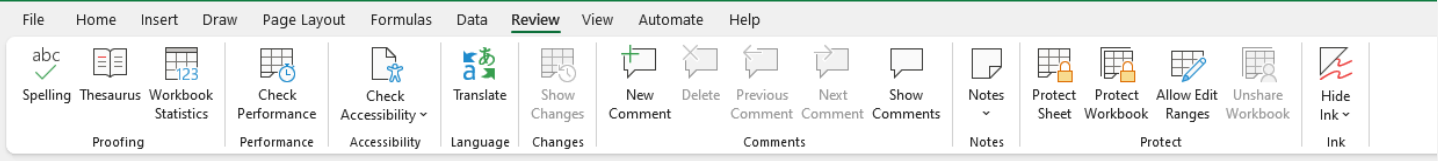

FORECAST GROUP

- **What-If Analysis** :- Different scenarios test karne ke liye.
 - Scenario Manager**
 - **Scenario Manager...** :- Different situations (scenarios) create aur compare karne ke liye.
 - 👉 Example: Best Case, Worst Case, Average Case
 - Goal Seek**
 - **Goal Seek...** :- Kisi formula ka desired result pane ke liye input value find karne ke liye.
 - 👉 Example: Agar total = 100 chahiye to input kitna hona chahiye?
- **Forecast Sheet** :- Future prediction chart banane ke liye.

OUTLINE GROUP

- **Group** :- Data ko group karne ke liye.
- **Ungroup** :- Group ko todne ke liye.
- **Subtotal** :- Grouped data ka subtotal calculate karne ke liye.

REVIEW TAB

PROOFING GROUP

- **Spelling** :- Spelling mistakes check aur correct karne ke liye. (F7)
- **Thesaurus** :- Similar words (synonyms) dekhne ke liye.
- **Workbook Statistics** :- Workbook ki details dekhne ke liye (cells, sheets etc.)

PERFORMANCE GROUP

- **Check Performance** :- Workbook ki performance issues detect karne ke liye.

ACCESSIBILITY GROUP

- **Check Accessibility** :- warnings check karne ke liye.

LANGUAGE GROUP

- **Translate** :- Text ko dusri language me convert karne ke liye.

COMMENTS GROUP

- **New Comment** :- Cell me naya comment add karne ke liye.
- **Delete** :- Comment delete karne ke liye.
- **Previous** :- Pichhle comment par jane ke liye.
- **Next** :- Agle comment par jane ke liye.
- **Show Comments** :- Sab comments show karne ke liye.

NOTES GROUP

- **Notes** :- Old style notes add/edit karne ke liye.

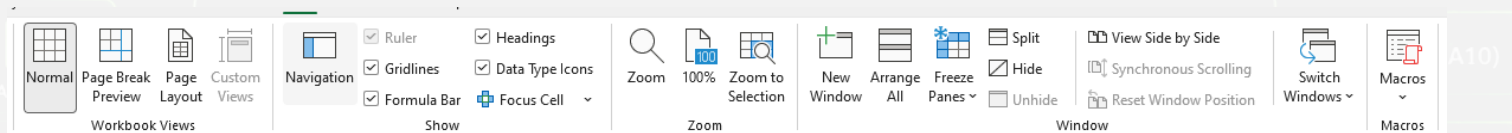

PROTECT GROUP

- **Protect Sheet** :- agar sheet protect karte hai to sheet me kuch bhi change nahi hoga. Lakeen kisi bhi sheet ko delet kar sakte hai or new sheet bhi add kar sakte hai.
- **Protect Workbook** :- agar workbook protect karte hai to sheet me change hoga. Lakeen na hi koi sheet delet hogi or na hi add hogi.
- **Allow Edit Ranges** :-alag alag range ke liye password lagan eke liye.

INK GROUP

- **Hide Ink** :- Ink drawings ko hide karne ke liye.

VIEW TAB

WORKBOOK VIEWS GROUP

- **Normal** :- Default working view me worksheet dikhane ke liye.
- **Page Break Preview** :-konsa data kis page me aayga ye dekhne ke liye.
- **Page Layout** :- Print layout jaisa view dekhne ke liye.
- **Custom Views** :-important data ko add karne ke liye taki us par asani se jaya ja sake.

SHOW GROUP

- **Ruler** :- Measurement ruler show/hide karne ke liye. jab page layout view hoga
- **Gridlines** :- Cells ki lines show/hide karne ke liye.
- **Formula Bar** :- Formula bar show/hide karne ke liye.
- **Headings** :- Row/column headings (A,B,C / 1,2,3) show/hide karne ke liye.
- **Data Type Icons** :- Special data type icons show/hide karne ke liye.
- **Focus Cell** :- Active cell highlight karne ke liye.

ZOOM GROUP

- **Zoom** :- Worksheet ko zoom in/out karne ke liye.
- **100%** :- Default size par lane ke liye.
- **Zoom to Selection** :- Selected area ko zoom karke dekhne ke liye.

WINDOW GROUP

- **New Window** :- Same workbook ki nayi window open karne ke liye.
- **Arrange All** :- Sab open windows ko arrange karne ke liye.
- **Freeze Panes** :- Rows/columns ko fix (freeze) karne ke liye scroll karte waqt.
- **Split** :- Window ko parts me divide karne ke liye.
- **Hide / Unhide** :- Workbook window hide ya wapas show karne ke liye.
- **View Side by Side** :- Do workbooks ko ek saath compare karne ke liye.
- **Synchronous Scrolling** :- Side by side scroll ko sync karne ke liye.
- **Reset Window Position** :- Window position normal karne ke liye.
- **Switch Windows** :- Open workbooks ke beech switch karne ke liye.

MACROS GROUP

- **Macros** :- Repeated tasks ke liye macro create/run karne ke liye.

EXCEL PRACTICAL QUESTIONS

BASIC WORKING & NAVIGATION

1. New workbook open karo
2. Workbook save karo different name se
3. Last row par jump karo
4. Last column par jao
5. A1 se XFD1048576 tak range select karo
6. Ek cell ka address identify karo
7. Ek range (A1:A10) select karo
8. Ctrl + Arrow se navigation karo
9. Workbook close karo
10. Workbook PDF me export karo

SELECTION & FILL

11. Shift + Arrow se cells select karo
12. Ctrl + Shift + Arrow se pura data select karo
13. Ctrl se multiple cells select karo
14. Fill handle se series banao (1-10)
15. Date series fill karo
16. Month series fill karo
17. Flash Fill se first name extract karo
18. Ek value ko niche fill karo

- 19. Ek value ko right fill karo
- 20. Fill → Series option use karo

● FORMAT & FONT

- 21. Text bold karo
- 22. Text italic karo
- 23. Text underline karo
- 24. Font size increase karo
- 25. Font size decrease karo
- 26. Cell ka background color change karo
- 27. Text color change karo
- 28. Borders apply karo
- 29. Wrap text apply karo
- 30. Merge & Center use karo

● NUMBER FORMATTING

- 31. Number ko currency me convert karo
- 32. Number ko percentage me convert karo
- 33. Number me comma lagao
- 34. Decimal increase karo
- 35. Decimal decrease karo
- 36. Date format apply karo
- 37. Time format apply karo
- 38. Fraction format apply karo
- 39. Scientific format apply karo
- 40. Number ko text me convert karo

● ALIGNMENT & CELLS

- 41. Text center align karo
- 42. Left align karo
- 43. Right align karo
- 44. Orientation change karo
- 45. Row height change karo
- 46. Column width change karo
- 47. AutoFit apply karo
- 48. Row hide karo
- 49. Column hide karo

=SUM(A1:A10)

=AVERAGE(B2:B10)

=IF(C2>100,
"High","Low")

=VLOOKUP(E2,
A2:D10,4,FALSE)

Overall Total Sales
418,000

Created by
Pawan Soni

50. Row/Column unhide karo

● INSERT & DELETE

51. New row insert karo

52. New column insert karo

53. New sheet insert karo

54. Selected cells insert karo

55. Row delete karo

56. Column delete karo

57. Sheet delete karo

58. Cells delete karo shift ke saath

59. Sheet rename karo

60. Sheet copy karo

● CONDITIONAL FORMATTING

61. Greater than rule apply karo

62. Less than rule apply karo

63. Between rule apply karo

64. Equal to apply karo

65. Duplicate values highlight karo

66. Top 10 items highlight karo

67. Bottom 10% highlight karo

68. Above average highlight karo

69. Data bars apply karo

70. Color scales apply karo

● SORT & FILTER

71. Data A to Z sort karo

72. Data Z to A sort karo

73. Custom sort apply karo

74. Filter lagao

75. Specific value filter karo

76. Greater than filter lagao

77. Between filter lagao

78. Top 10 filter lagao

79. Filter clear karo

80. Advanced filter lagao

=SUM(A1:A10)

=AVERAGE(B2:B10)

=IF(C2>100,
"High","Low")

=VLOOKUP(E2,
A2:D10,4,FALSE)

DATA TOOLS

81. Text to Columns (comma separated) karo
82. Text to Columns (fixed width) karo
83. Duplicate remove karo
84. Data validation dropdown banao
85. Number validation lagao
86. Flash fill use karo
87. Data consolidate karo
88. Scenario Manager use karo
89. Goal Seek apply karo
90. Data Table create karo

CHART & INSERT

91. Column chart banao
92. Line chart banao
93. Pie chart banao
94. Chart ka color change karo
95. Chart type change karo
96. Chart me title add karo
97. Screenshot insert karo
98. Shape insert karo
99. SmartArt insert karo
100. Checkbox insert karo

ADVANCED (EXAM LEVEL)

101. PivotTable create karo
102. Pivot me filter lagao
103. Pivot me slicer add karo
104. Pivot me timeline lagao
105. PivotTable refresh karo
106. PivotChart banao
107. Freeze Panes apply karo
108. Split window use karo
109. Zoom to selection karo
110. Macro record karo
