Notepad – Introduction

Notepad ek simple aur basic text editor software hai jo Windows operating system ke saath aata hai. Iska use plain text likhne aur edit karne ke liye kiya jata hai.
Notepad me hum simple text type kar sakte hain, jaise notes likhna, programming code likhna, ya kisi document ka basic draft banana.
Isme koi advanced formatting options nahi hote, jaise bold, italic, ya images add karna. Isi liye Notepad ko plain text editor kaha jata hai.
Notepad ka file format aam taur par .txt (Text File) hota hai.
Programmers bhi Notepad ka use kabhi-kabhi simple coding files banane ke liye karte hain, jaise HTML, CSS, JavaScript ki basic files.
Isliye Notepad ek lightweight aur fast tool hai jo basic text writing aur editing ke liye bahut useful hai.

FILE TAB

1. New
Kya hai: Bilkul khali naya text file kholta hai (blank page).
Kaise use karen:

1. Notepad kholo.
2. File > New click karo.
3. Naya blank document aa jayega (purana agar unsaved tha to save ka poochhega).

Shortcut: Ctrl + N
2. New Window
Kya hai: Ek alag naya Notepad window kholta hai (same time pe do Notepad chal sakte hain).
Kaise use karen:

1. File > New Window.
2. Ek naya Notepad window khulega (blank).

Shortcut: Ctrl + Shift + N
3. Open... (File kholo)
Kya hai: Computer se pehle se saved text file (.txt ya aur supported formats) ko kholta hai edit karne ke liye.
Kaise use karen:

1. File > Open... click karo.
2. File Explorer khulega.
3. .txt file (ya .log, .ini etc.) select karo.
4. Open dabao – file content Notepad mein aa jayega.

Shortcut: Ctrl + O
4. Save

THE ARTIFICIAL EDUCATION

Kya hai: Current text ko usi file mein save kar deta hai (overwrite).

Kaise use karen:

1. File > Save click karo.
2. Agar pehli baar save kar rahe ho to naam aur folder choose karna padega (Save As jaise).
3. Save ho jayega.

Shortcut: Ctrl + S

5. Save As...

Kya hai: File ko naye naam se, nayi jagah pe ya naye encoding mein save karta hai (jaise ANSI, UTF-8, UTF-8 with BOM etc.).

Kaise use karen:

1. File > Save As... click karo.
2. Folder choose karo.
3. File name daalo (extension .txt daalna best hai).
4. Save as type mein encoding choose karo agar chahiye (default ANSI).
5. Save dabao.

Shortcut: Ctrl + Shift + S

6. Page Setup...

Kya hai: Print karne se pehle page ka layout set karta hai – paper size, margins, header/footer, orientation (portrait/landscape).

Kaise use karen:

1. File > Page Setup... click karo.
2. Paper size (A4, Letter etc.), orientation, margins change karo.
3. Header/Footer mein text daal sakte ho (jaise &f for filename, &d for date).
4. OK dabao.

Shortcut: Koi direct nahi.

7. Print...

Kya hai: Notepad ke text ko printer se print karta hai.

Kaise use karen:

1. File > Print... click karo.
2. Printer select karo.
3. Copies number, pages range set karo.
4. Preferences se quality wagairah adjust karo.
5. Print button dabao.

Shortcut: Ctrl + P

8. Exit

Kya hai: Notepad program ko pura close kar deta hai.

Kaise use karen:

1. File > Exit click karo.
2. Agar text unsaved hai to save karne ka poochhega (Yes/No/Cancel).

Shortcut: Alt + F4 (sabse tez tareeka)

EDIT

1. Undo

Kya hai: Last kiya gaya action (jaise type karna, delete karna) ko wapas kar deta hai (galti sudharne ke liye).

Kaise use karen:

1. Edit > Undo click karo.
2. Last change undo ho jayega (multiple baar kar sakte ho).

Shortcut: Ctrl + Z

2. Cut

Kya hai: Selected text ko cut karta hai (copy + delete) – clipboard pe jaata hai.

Kaise use karen:

1. Text select karo (mouse se drag ya double-click word pe).
2. Edit > Cut click karo.
3. Text gayab ho jayega lekin clipboard pe rahega.

Shortcut: Ctrl + X

3. Copy

Kya hai: Selected text ko copy karta hai (clipboard pe jaata hai, original nahi delete hota).

Kaise use karen:

1. Text select karo.
2. Edit > Copy click karo.

Shortcut: Ctrl + C

4. Paste

Kya hai: Clipboard se copied/cut text ko current cursor position pe lagata hai.

Kaise use karen:

1. Cursor jahan paste karna hai wahan click karo.
2. Edit > Paste click karo.

Shortcut: Ctrl + V

5. Delete

Kya hai: Selected text ko delete kar deta hai (clipboard pe nahi jaata).

Kaise use karen:

1. Text select karo.
2. Edit > Delete click karo.

Shortcut: Del (Delete key)

6. Search with Bing...

Kya hai: Selected text ko Bing search engine pe search karta hai (browser khulega).

Kaise use karen:

1. Text select karo.

2. Edit > Search with Bing... click karo.
3. Browser khulega aur search result dikhega.

Shortcut: Ctrl + E

7. Find...

Kya hai: Document mein koi word ya phrase dhundta hai.

Kaise use karen:

1. Edit > Find... click karo.
2. Find what box mein word daalo.
3. Find Next dabao – cursor us word pe jayega.

Shortcut: Ctrl + F

8. Find Next

Kya hai: Find kiye gaye word ka next occurrence dhundta hai.

Kaise use karen:

1. Pehle Find... se search shuru karo.
2. Edit > Find Next click karo (ya F3 dabao).

Shortcut: F3

9. Find Previous

Kya hai: Find kiye gaye word ka pehle wala occurrence dhundta hai (backward search).

Kaise use karen:

1. Find... se shuru karo.
2. Edit > Find Previous click karo.

Shortcut: Shift + F3

10. Replace...

Kya hai: Ek word ko dhund ke usko dusre word se replace karta hai (find & replace).

Kaise use karen:

1. Edit > Replace... click karo.
2. Find what mein purana word, Replace with mein naya word daalo.
3. Replace ya Replace All dabao.

Shortcut: Ctrl + H

11. Go To...

Kya hai: Cursor ko specific line number pe le jaata hai (bade files mein useful).

Kaise use karen:

1. Edit > Go To... click karo.
2. Line number daalo.
3. Go To dabao – cursor us line pe chala jayega.

Shortcut: Ctrl + G

12. Select All

Kya hai: Pura document ka text select kar deta hai (copy/cut ke liye).

Kaise use karen:

1. Edit > Select All click karo.

Shortcut: Ctrl + A

13. Time/Date

Kya hai: Current system time aur date ko cursor position pe insert kar deta hai (jaise log file mein).

Kaise use karen:

1. Cursor jahan time/date daalna hai wahan rakho.
2. Edit > Time/Date click karo.

Shortcut: F5

FORMAT

1. Word Wrap (Word Wrap on/off)

Kya hai: Yeh option decide karta hai ki text line mein screen ke end pe pahunchne par automatically next line pe chala jaye ya nahi. Agar on hai to text window ke andar hi wrap ho jata hai (scroll horizontally nahi karna padta). Agar off hai to ek hi lambi line banti rehti hai.

Kaise use karen:

1. Format > Word Wrap pe click karo.
2. Tick mark aa jayega (on ho jayega) ya hat jayega (off ho jayega).
3. Jab tick mark dikhega tab word wrap active hai.

Shortcut: Koi direct shortcut nahi (menu se hi toggle karna padta hai).

Fayda:

- Word Wrap on rakho to long text padhna easy hota hai (jaise code ya notes mein).
- Off karne se text exactly same dikhta hai jaise print hoga (exact line breaks).

2. Font...

Kya hai: Pura document ka font style, size, type aur effects change karne ka option (jaise font family, bold, italic, size wagairah).

Kaise use karen:

1. Format > Font... click karo.
2. Font window khulega.
    - Font: Font family choose karo (jaise Arial, Times New Roman, Calibri, Consolas etc.).
    - Font style: Regular, Italic, Bold, Bold Italic.
    - Size: Font size number daalo (jaise 10, 12, 14, 16).
    - Script: Agar Hindi/Devanagari text hai to Unicode ya appropriate script choose kar sakte ho.
    - Effects: Strikeout ya Underline tick kar sakte ho.
3. Sample box mein preview dekho.
4. OK dabao – pura Notepad ka text us font mein change ho jayega.

Shortcut: Koi direct shortcut nahi (menu se hi kholna padta hai).

VIEW

1. Zoom

Yeh text ko bada-chhota karne ke options deta hai (sirf viewing ke liye, text file mein koi change nahi hota).

- **Zoom InKya hai**: Text font ko bada karta hai (screen pe padhna easy ho jata hai). **Kaise use karen**: View > Zoom > Zoom In click karo. **Shortcut**: Ctrl + Plus (+) (Har baar press karne pe zoom level badhta hai – jaise 125%, 150% etc.)
- **Zoom OutKya hai**: Text font ko chhota karta hai (pura page dekhne ke liye). **Kaise use karen**: View > Zoom > Zoom Out click karo. **Shortcut**: Ctrl + Minus (-) (Zoom level ghatta hai – jaise 75%, 50% etc.)
- **Restore Default ZoomKya hai**: Zoom level ko wapas 100% (normal size) pe laata hai. **Kaise use karen**: View > Zoom > Restore Default Zoom click karo. **Shortcut**: Ctrl + 0 (zero)

Extra Tip Zoom ke liye: Sabse tez tareeka – Ctrl key hold karke mouse wheel up (zoom in) ya down (zoom out) ghumao. Yeh Notepad mein bhi kaam karta hai!

2. Status Bar

Kya hai: Neeche status bar dikhaata hai ya chhupaata hai. Status bar mein current line number, column number, aur file length (characters) dikhta hai (jaise "Ln 5, Col 12").

Kaise use karen:

1. View > Status Bar pe click karo.
2. Tick mark aa jayega (status bar dikhega) ya hat jayega (status bar gayab).
3. Default mein tick mark hota hai (on).

Shortcut: Koi direct shortcut nahi (menu se hi toggle karna padta hai).
