THE ARTIFICIAL EDUCATION

WordPad – Introduction

WordPad ek basic word processing software hai jo Windows operating system ke saath aata hai. Ye Notepad se thoda advanced hota hai aur simple documents banane ke liye use kiya jata hai.

WordPad ka use text likhne, edit karne aur basic formatting karne ke liye kiya jata hai. Isme hum font change kar sakte hain, text ko bold, italic aur underline kar sakte hain, aur paragraph ko align bhi kar sakte hain.

Isme hum images bhi insert kar sakte hain, jo Notepad me possible nahi hota.

WordPad simple letters, notes, aur small documents banane ke liye useful hota hai. Ye MS Word jitna advanced nahi hota, lekin basic document writing ke liye kaafi helpful hai.

WordPad me files aam taur par .rtf (Rich Text Format) aur .txt format me save ki ja sakti hain.

FILE TAB

1. New

Kya hai: Bilkul naya, blank document kholta hai (default RTF format mein).

Kaise use karen:

1. WordPad kholo.
2. File > New click karo.
3. Naya blank page aa jayega (purana agar unsaved tha to save ka poochhega).

Shortcut: Ctrl + N

2. Open

Kya hai: Pehle se saved file (.rtf, .docx, .odt, .txt, .doc etc.) ko kholta hai editing ke liye.

Kaise use karen:

1. File > Open click karo.
2. File Explorer khulega.
3. File select karo (supported formats list mein dikhte hain).
4. Open dabao – document load ho jayega.

Shortcut: Ctrl + O

3. Save

Kya hai: Current changes ko usi file mein save kar deta hai (overwrite).

Kaise use karen:

1. File > Save click karo.
2. Agar pehli baar save kar rahe ho to Save As jaise naam/location choose karna padega.
3. Save ho jayega.

Shortcut: Ctrl + S

4. Save as

Kya hai: File ko naye naam se, nayi jagah pe ya alag format mein save karta hai. Yeh sabse zyada use hota hai format change karne ke liye.

Sub-options (formats):

- **Rich Text Document (.rtf)** – Default, formatting save hoti hai.
- **ODF Text Document (.odt)** – OpenDocument format (LibreOffice ke saath compatible).
- **Plain Text Document (.txt)** – Sirf text, no formatting.
- **Word Document (.docx)** – Microsoft Word format (limited compatibility, WordPad mein full .docx nahi banta).
- **OpenDocument Text (.odt)** – Same as ODF.

Kaise use karen:

1. File > Save as > format choose karo.
2. Folder select karo, file name daalo.
3. Save dabao.

Shortcut: F12 (ya Ctrl + Shift + S kuch cases mein)

5. Print

Kya hai: Document ko printer se print karne ke options.

Sub-options:

- **Print**: Printer choose karo, copies, pages range set karo aur print. **Shortcut**: Ctrl + P
- **Page setup**: Paper size (A4, Letter), orientation (portrait/landscape), margins, header/footer set karo.
- **Print preview**: Print hone se pehle screen pe preview dekho (changes bhi kar sakte ho).

Kaise use karen:

1. File > Print > option choose karo.
2. Settings adjust karo.
3. Print ya OK dabao.

6. Page setup

Kya hai: Print ke liye page layout set karta hai (margins, orientation, header/footer).

Kaise use karen:

1. File > Page setup click karo.
2. Size, margins, orientation change karo.
3. Header/Footer mein text daal sakte ho (jaise &f for filename, &d for date).
4. OK dabao.

Shortcut: Koi direct nahi.

7. Send in email

Kya hai: Current document ko email attach karke bhejta hai (Windows ke default mail client se, jaise Mail ya Outlook).

Kaise use karen:

1. File > Send in email click karo.
2. Email app khulega.
3. File attach ho jayegi – to address, subject daalo aur send karo.

Shortcut: Koi nahi.

8. About WordPad

Kya hai: WordPad ke baare mein info – version number, copyright, Microsoft credit.

Kaise use karen:

1. File > About WordPad click karo.
2. Ek small window khulega jisme details honge.

Shortcut: Koi nahi.

9. Exit

Kya hai: WordPad program ko pura close kar deta hai.

Kaise use karen:

1. File > Exit click karo.
2. Agar unsaved changes hain to save ka poochhega (Yes/No/Cancel).

Shortcut: Alt + F4

HOME TAB

1. Clipboard Group (Left side – Cut, Copy, Paste icons)

Yeh text copy-paste ke liye basic tools.

- **Paste** (clipboard icon): Clipboard se text ya object paste karta hai. **Kaise use karen**: Cursor jahan paste karna hai wahan click > Paste button dabao. **Shortcut**: Ctrl + V
- **Cut** (scissors icon): Selected text ko cut karta hai (copy + delete). **Shortcut**: Ctrl + X
- **Copy** (two pages icon): Selected text ko copy karta hai. **Shortcut**: Ctrl + C

2. Font Group (Calibri, 11 dropdowns wala area)

Text ka look change karne ke liye sabse important group.

- **Font family** (Calibri dropdown): Font type choose karo (Arial, Times New Roman, Calibri, Consolas etc.). **Kaise use karen**: Dropdown se font select karo – selected text change ho jayega.
- **Font size** (11 dropdown): Size badhao (8, 10, 12, 14, 18, 24 etc.). **Kaise use karen**: Number select karo ya manually type karo.
- **Grow font** (A^ icon): Font size thoda bada karta hai.
- **Shrink font** (A_v icon): Font size thoda chhota karta hai.
- **Bold** (B icon): Text bold karta hai. **Shortcut**: Ctrl + B

1. Zoom Group (Left side – + - 100% icons)

Document text ko bada-chhota karne ke liye.

- **Zoom in** (+ icon): Text aur content ko bada karta hai (details dekhne ke liye). **Kaise use karen**: Zoom in button dabao – har baar zoom level badhta hai (125%, 150% etc.). **Shortcut**: Ctrl + Plus (+) ya Ctrl + Mouse wheel up
- **Zoom out** (- icon): Text ko chhota karta hai (pura page dekhne ke liye). **Kaise use karen**: Zoom out button dabao. **Shortcut**: Ctrl + Minus (-) ya Ctrl + Mouse wheel down
- **100%** (100% button): Zoom level ko wapas normal (100%) pe laata hai. **Kaise use karen**: 100% button dabao. **Shortcut**: Ctrl + 0 (zero)

2. Show or hide Group

Extra helpers show/hide karne ke liye – ruler, status bar.

- **Ruler** (checkbox): Top pe ruler (scale) dikhaata hai (inches ya cm mein) – margins, tabs, indent set karne ke liye bohot useful. **Kaise use karen**: Checkbox tick karo – ruler on ho jayega (screenshot mein jaise dikh raha hai: 1 ... 2 ... scale with triangles for margins). **Shortcut**: Koi direct nahi.
- **Status bar** (checkbox): Neeche status bar dikhaata hai – jisme current cursor position (page, line, column), zoom level, word count wagairah dikhta hai. **Kaise use karen**: Checkbox tick rakho (default on hota hai) – off karne se status bar gayab. **Shortcut**: Koi nahi.

3. Settings Group

Document viewing aur formatting settings.

- **Word wrap** (dropdown): Text ko line end pe wrap karne ka option. **Options**:
  - **In window** (default): Text window ke andar hi wrap ho jata hai (no horizontal scroll).
  - **No wrap**: Text lambi line mein rehti hai (horizontal scroll bar aata hai). **Kaise use karen**: Dropdown se choose karo – change hone pe text layout turant update ho jata hai. **Shortcut**: Koi nahi (menu se hi).
- **Measurement units** (dropdown): Ruler aur margins ka unit change karta hai. **Options**:
  - Inches (default US)
  - Centimeters (cm – India/Europe mein common)
  - Points
  - Picas **Kaise use karen**: Dropdown se unit select karo – ruler scale turant change ho jayegi (jaise inches se cm pe switch karne pe numbers badal jaate hain).
